

## Environmental Policy Statement

HVMS Power Engineering recognises its responsibilities to protect the environment in the successful operation of the Companies activities within all industries including the Electricity, Rail, Water, Oil and Gas industries. This statement is a declaration of the Board's intent to ensure that we adequately manage our works, prevent pollution and continually improve the operation and environmental management of our activities.

### High Voltage Maintenance Services Limited commits to:

- A policy of striving for environmental sustainability in all our business activities. We seek to achieve this by implementation of an Environmental Management System (EMS), using BS8555 (Project Acorn) as a phased approach towards ISO 14001 Certification. We will operate the EMS in tandem with our quality and health & safety policies.
- We recognise the social and ethical importance of environmental best practice and will strive to achieve continual improvement in identifying our environmental aspects and minimising any adverse impacts which may arise from them.
- Compliance with or exceeding legal requirements.
- Review of purchasing practices and internal operations particularly including transport and energy to ensure best use of resources.
- Reducing the creation of waste by the adoption of improved operating practices and by the recycling of materials whenever practical.
- Ensuring all waste and effluent is stored, transported and disposed of in a safe and responsible manner.
- Making this policy publicly available along with our achievements set against our objectives as defined in our EMS.

The management of High Voltage Maintenance Services Limited are totally committed to this policy and will provide all necessary resource, education and training for all concerned in the operation of its EMS.
